

# Harmonic Convergence From Prophecy to the Fourth Dimension Navigating by the Law of Time

by [Jose Arguelles](#)

The Harmonic Convergence was a real time prophecy. Quetzalcoatl, who lived at the very end of the first millennium, was a real prophet, and his prophecy of Thirteen Heavens and Nine Hells is a genuine prophecy based on Mayan time knowledge. The Mayan time knowledge that was lost was far more important than we can realize.

In 1952, a fabulous Mayan tomb was opened in Palenque, Chiapas, Mexico, the tomb of Pacal Votan. The year after that tomb was opened, Jose Arguelles began a quest for the lost knowledge. This quest took him to the prophecies of Quetzalcoatl and the Harmonic Convergence, August 16-17, 1987, the achievement of the prophecy of Thirteen Heavens and Nine Hells.

As the fulfillment of the prophecy of Quetzalcoatl, the Harmonic Convergence sent out the alert: only 25 years to the end of the Mayan Great Cycle, the measure of history, AD 2012. Prophecy is not an academic topic. The prophecy of Thirteen Heavens and Nine Hells was realized in order that the earth and the people of the earth might enter a cleansing.

The responsibility of being the one who called the Harmonic Convergence is profound. For this reason, following the Harmonic Convergence, his partner Lloydine and he, were compelled to devote their lives to the message of the Harmonic Convergence. Little did they know ten years ago that they were beginning a journey through the fourth dimension.

What is called normal society, they came to realize more scientifically, is actually a consensus reality driven by an unconscious, irregular, artificial timing frequency called the 12:60: twelve-month calendar, 60-minute hour. By contrast, they found themselves living by the natural timing frequency of 13:20, measured and known by the Maya through their famous "calendar," now rediscovered by Jose as the Law of Time.

Navigating by the Law of Time, the lost knowledge of the Maya came to be embodied by them and realized through a number of new instruments of knowledge: the Dreamspell, the Telektonon, the 20 Tablets of the Law of Time, and, most important, the Thirteen Moon Calendar.

As they delved more intently into a true understanding of time and the fourth dimension, deeper levels of Maya prophecy were revealed to them. They are messengers of a living prophecy. The essence of this prophecy is very simple: due to living in the wrong time, humanity is creating a planetary moral emergency.

Exchange the irregular Gregorian calendar for the regular 28-day Thirteen Moon Calendar, then peace and environmental harmony will be. We cannot really expect to have a new millennium without a new time, and we cannot have a new time unless we have a new calendar.

This simple message is rooted in profound knowledge and is the source of the Thirteen Moon Calendar Change Peace Plan and World Thirteen Moon Calendar Change Peace Movement. Though Americans know virtually nothing about this Peace Movement, we are here now to let them know as well that we have already initiated the Calendar Change Peace Plan. We now ask the American people and all people world-wide to support us in this unprecedented peace initiative.

Since the destruction of the Mayan time knowledge was completed by a Vatican calendar "reform" in 1582 which gave us the calendar we use today, Jose and Lloydine Arguelles went to Rome and appealed directly to Pope John Paul II, inviting him to join them in the calendar change, and, on behalf of world peace, to make further confession of the Church's historical errors.

Since the Gregorian Calendar is actually an instrument of the Vatican, the Pope's compliance with the knowledge of the Law of Time will make the calendar change easy and celebratory in the highest sense of the word.

The time for this calendar change is July 26, 1998, when Sunday on the Gregorian calendar will also be Sunday the first day of the Thirteen Moon Calendar year.
